

NEW! 1140 Series Low VOC Transfer Tapes

Adchem, The Adhesive Tape Engineers, proudly introduce their latest innovations for laminating, bonding, and mounting applications. Featuring a low VOC, environmentally-friendly solvent-free acrylic adhesive formulation, the 1140 series exhibits high adhesion to medium and low-surface energy materials. The 1140 series is a cost-competitive product that includes multiple thickness options as well as both unsupported and scrim-reinforced structures to meet a variety of application requirements.

Recommended Applications:

- Laminating and bonding applications on high, medium, and low surface energy materials
- Bonding rough and porous materials such as non-wovens, felts, foams, and fabrics
- Automotive interior mounting
- Automotive acoustic/insulation mounting

Features

Benefits

Solvent-Free Acrylic Adhesive

- Low VOC, environmentally friendly
- Excellent resistance to solvents, chemicals, plasticizers
- High peel and high initial tack
- Good wet-out on rough and porous surfaces
- Excellent high/low temperature performance

55# Glassine Liner

- Good moisture resistance
- Easy release

Scrim-Reinforced Option

- Provides added strength and dimensional stability

1140 Series tapes have been tested to several Automotive OEM Specifications including Ford, GM, Fiat Chrysler, and Nissan. Contact Adchem for available test reports!
